Chen Peleg

Front-End Developer

ABOUT ME

Founder of Adam Hevra Veteva school for at-risk youth. Passionate about technology and its ability to improve our lives. Developed technological systems for multiple schools, alongside being a teacher and an educator. In recent years I have been focusing on developing educational games and software to help the students learn better and in more enjoyable and varied ways. After years in the education field I'm interested in a new path as a full-time software developer.

EDUCATION

Beit-Berl college
B.A in History and Informal Education
2009 - 2013

Software Development
Self taught, with Udemy, Codecademy etc.
2013 - 2018

EXPERIENCE

Dror Batey Hinuch   2016-2020

School management systems: Designing and building the student attendance and overall school management systems. The systems were implemented at three schools in the DBH network.

Educational software and Educational games Developer: Design, characterising and implementing educational games. The games were adapted for different schools and student types, with the ability to replace the game's content in a simple way for eachers without a technical background. The games and Educational software were developed mainly with vanilla Javascript, React and Node.js.

Adam hevra VeTeva   2008-2015

One of the founders of the school. In charge of technological-based learning, alongside being a teacher.

SKILLS & PROFICIENCY

Front-End Application development: vanilla JavaScript, Angular 2+, React, React testing with Jest and Enzyme, Vue, general web-development (HTML, CSS, UI, etc.), Google apps scripts.

Node.js: RESTful API design and development, async architecture (callbacks, promises, async- await).

Additional fields: Git and Github actions, Python (Django), Linux bash, MongoDB compatible DBs, Aws: Ec2, S3.

PROJECTS AND ARTICLES

ClassUp - This app was created to help teachers and educators teach with computers or smartphones. Built with React 16.
https://github.com/ChenPeleg/Classup

Medium Articles - Articles about my experience with Google App Scripts, mainly productivity scripts examples.
https://medium.com/@chenpeleg

Example Games - A few of the games I designed and programmed:
