Chen Peleg

Front-End Developer

ABOUT ME

Passionate about technology and its ability to improve our lives. After several years in the field of education, I went on a new path as a full-time software developer. I've developed technological systems for multiple schools as well as educational games and software to help students learn better and in more enjoyable and varied ways.

EDUCATION

Beit-Berl college
B.A in History and Informal Education
2009 - 2013

Software Development
Self taught, with Udemy, Codecademy etc.
2013 - 2018

EXPERIENCE

T.N.M
2020-2022

Civil engineering projects: Maintaining and upgrading a civil engineering project management app. The app included a user interface in addition to a chemical laboratories interface. My work included front-end architecture design and development (Angular 2+) and back-end (ASP.NET core) REST api development.

Dror Batey Hinuch
2016-2020

School management systems: Designing and building the student attendance and overall school management systems. The systems were implemented at three schools in the DBH network.

Educational software and Educational games Developer: Design, characterising and implementing educational games. The games were adapted for different schools and student types, with the ability to replace the game's content in a simple way for eachers without a technical background. The games and Educational software were developed mainly with vanilla Javascript, React and Node.js.

SKILLS & PROFICIENCY

Front-End Application development: Vanilla JavaScript, Angular 2+, React, React testing with Jest and Enzyme, Vue, general web-development (HTML, CSS, UI, etc.), Google apps scripts.

ASP.NET Core: Experience in working with Microsoft technologies like C# , ASP.NET WEB API, .Net Core, ADO.NET, Microsoft SQL Server, IIS, TFS.

Node.js: RESTful API design and development, async architecture (callbacks, promises, async- await).

Additional fields: Git and Github actions, Python (Django), Linux bash, MongoDB compatible DBs, Aws: Ec2, S3.

PROJECTS AND ARTICLES

ClassUp - This app was created to help teachers and educators teach with computers or smartphones. Built with React 16.
https://github.com/ChenPeleg/Classup

Medium Articles - Articles about my experience with Google App Scripts, mainly productivity scripts examples.
