Chen Peleg

Front-End Developer

👤 ABOUT ME

Founder of Adam Hevra Veteva school for at-risk youth. Passionate about technology and its ability to improve our lives. Developed technological systems for multiple schools, alongside being a teacher and an educator. In recent years I have been focusing on developing educational games and software to help the students learn better and in more enjoyable and varied ways. Now I am interested in full-time work in development.

📖 EDUCATION

Beit-Berl college
B.A in History and Informal Education
2009 - 2013

Software Development
Self taught, with Udemy, Codecademy etc.
2013 - 2018

💼 EXPERIENCES

Adam hevra VeTeva
Tsahal 109 Karmiel   2008-2015

One of the founders of the school. In charge of technological-based learning, alongside being a teacher.

Dror Batey Hinuch
Kibbutz Galuyot 120 Tel Aviv   2016-2020

School management systems: Designing and building a students attendance and school management systems, with google apps scripts and google drive/classroom api. The systems were implemented at three schools in DBH.

Educational software and Educational games Developer: Design, characterising and implementing educational games. The games were designed mostly for English lessons, but were easily adaptable for other subjects.

🚀 SKILLS & PROFICIENCY

Front-End Aplication development: vanila JavaScript, Angular 2+, React, React testing with Jest and Anzime, Vue, general web-development (HTML, CSS, UI, etc.), Google apps scripts.
Node.js: RESTful API design and development, async architecture (callbacks, promises, async- await).
Additional fields: Git and Github actions, Python (Django), Linux bash, MongoDB compatible DBs, Aws: Ec2, S3.

🗔 PROJECTS AND ARTICLES

ClassUp - This app was created to help teachers and educators teach with computers or smartphones. Built with React 16.

Medium Articles - My medium articles about my Google App Scripts experience, mainly about productivity scripts examples.
